WORK EXPERIENCE

PHP Full Stack Developer

Oct 2024 – Present

Exact IT Solutions Private Limited

- Developed and maintained dynamic, responsive and high-performance web applications using PHP, jQuery, AJAX and MySQL ensuring a seamless user experience, while adhering for maintainable and clean code.
- Created dynamic PHP APIs with AJAX request to deliver real-time data updates, leveraging PDO MySQL for database queries, ensuring high security and performance.

PHP Full Stack training

March 2024 – Oct 2024

Ducat-The It Training

Noida, U.P

- Engaged in the PHP full stack training program that teaches fundamental concepts and advanced techniques in both Front-End and Back-End Development.

PROJECTS

M2i File Locker Web Application

- Developed a dynamic application to enable users to create, organize and manage multiple subfolder and files within their main folder, ensuring a seamless experience.
- Developed a secured file sharing mechanism, allowing users to generate shareable links to provide access to their folder/file with both internal and external users. Additionally, implemented an intuitive storage management system that tracks and displays real-time storage usage, for specific users.
- Designed and integrated the feature for users to free up the space by moving file/folder to trash and restore or delete them permanently as per users needs.

Life Trust Portal's

- Develop a modern and digital website providing a user-friendly platform for paying and managing bills of users.
- Integrations with multiple APIs for ensuring secure and real-time transactions for bill payments.
- Added error handling that ensures smooth interactions between the application and external APIs, preventing failed transactions.
